

Yash Gulati

Application Security Engineer | VAPT & Penetration Testing

Delhi, India · +91-9205538227 · contactyashgulati@gmail.com · linkedin.com/in/yashgulatii · github.com/yashgulatii · yashgulatii.pages.dev

PROFESSIONAL SUMMARY

Application security professional pursuing AppSec Engineer and Junior Penetration Tester roles, with a responsibly disclosed CVSS 8.9 Broken Access Control/IDOR finding in a live production application, a black-box VAPT engagement against MobiKwik web assets with a CVSS-scored formal report, and a self-built Active Directory attack lab (Chakravyuha) in progress, scoped to 9 MITRE ATT&CK techniques from Kerberoasting through DCSync and ACL abuse. Top 2% global TryHackMe ranking (192 rooms, 22 badges) · CNSP Certified · Google Cybersecurity Certified. Pursuing Microsoft SC-200 — exam scheduled July 26, 2026.

TECHNICAL SKILLS

Web App Security: OWASP Top 10, Broken Access Control, IDOR, SQL Injection, XSS, Auth Bypass, Session Hijacking, CVSS Scoring

Active Directory & Identity: Kerberos, LDAP, NTLM, AD Tiering Model (Tier 0/1/2), Group Policy

Security Tools: Burp Suite, SQLMap, OWASP ZAP, Nmap, Metasploit, Hydra, John the Ripper, Kali Linux

Microsoft Security Stack (SC-200 prep): Microsoft Sentinel, Microsoft Defender XDR, KQL (Kusto Query Language)

Scripting & OS: Python (advanced), Bash, PowerShell, Linux CLI, Windows, VMware Workstation Pro

Cryptography & Networking: AES-256, RSA-2048, Diffie-Hellman, TLS/HTTPS, TCP/IP, DNS, HTTP/S, 802.11 Wi-Fi

PROFESSIONAL EXPERIENCE

Cybersecurity & Ethical Hacking Intern · Tamizhan Skills – RISE Program, New Delhi

June – July 2025

- Implemented OWASP Top 10 attack vectors with full mitigations in DualAuth — SQL injection, auth bypass, session hijacking, brute-force — each mapped to OWASP category with documented vulnerable vs. secure delta
- Built 7 offensive security tools in Python — network scanner (Netra), Wi-Fi recon (AirTrace), encrypted messaging (EnChat: AES-256/RSA-2048), ransomware simulation (SimLock), keystroke logger (KeyScope), password entropy evaluator (EntropyX) — all documented and open-source on GitHub

PROJECTS

CampusTrack – Secure Cross-Platform College Management System | Aug 2025 – May 2026

Flask · Firebase Auth · SQLite · Python · Linux · Role-Based Access Control

- Identified and patched a CVSS 8.9 Broken Access Control/IDOR vulnerability in production with live users — documented with proof-of-concept, root cause analysis, and remediation; designed Firebase security rules and automated log monitoring

VAPT Assessment – MobiKwik Web Assets [Interview Assignment] | March 2026

Black-box Penetration Testing · CVSS Scoring · Formal Report Writing

- Conducted 2-day black-box VAPT against *.mobikwik.com — produced formal report with CVSS-scored findings, proof-of-concept documentation, executive summary, and remediation recommendations

DualAuth – Vulnerable vs. Secure Authentication Platform | June 2025

Python · SQL · OWASP Top 10

- Built controlled demo environment with 5 live OWASP attack vectors and full mitigations — each finding mapped to OWASP category with documented delta between vulnerable and secure implementations

Chakravyuha – Active Directory Purple Team Lab [In Progress] | 2026 – Present

Windows Server 2022 · VMware Workstation Pro · Rubeus · Impacket · BloodHound · MITRE ATT&CK

- Architecting and building a 6-VM closed Active Directory lab to execute and document 9 techniques — Kerberoasting, AS-REP Roasting, Pass-the-Hash/Ticket, Golden Ticket, DCSync, BloodHound ACL abuse, and LAPS Bypass — using Rubeus, Impacket, and BloodHound; domain controller (DC01) validated, file server (SRV01) build in progress
- Mapping each technique to MITRE ATT&CK and documenting the build as a 9-part technical blog series on Hashnode

CYBERSECURITY ACHIEVEMENTS

TryHackMe — tryhackme.com/p/yashgulatii

Top 2% Globally · Rank 31,908 · 192 Rooms Completed · 22 Badges | 2024 – Present

- Completed Junior Penetration Tester, SOC Level 1, and Cyber Security 101 paths — web exploitation, privilege escalation, MITRE ATT&CK, and network forensics in live lab environments

EDUCATION

B.Sc. (Honours) Electronic Science · Rajdhani College, University of Delhi · 2022 – Present

CERTIFICATIONS

- Certified Network Security Practitioner (CNSP) · The SecOps Group, 2024
- Google Cybersecurity Professional Certificate · Google, 2024 — Linux administration, secure coding, network security, incident response
- Microsoft SC-200: Security Operations Analyst Associate — In Progress, exam scheduled July 26, 2026
