PROFESSIONAL SUMMARY

Security professional with 7 Python offensive security tools (open-source, GitHub), real-world black-box VAPT on MobiKwik web assets with CVSS-scored report, and Top 2% global TryHackMe ranking (192 rooms, 22 badges). Google Cybersecurity Certified · CNSP Certified. Seeking SOC L1 Analyst role to monitor, triage, and respond to security incidents.

TECHNICAL SKILLS

SIEM & Monitoring: Splunk, ELK Stack (Elasticsearch · Logstash · Kibana), Wireshark, IDS/IPS concepts

Threat Analysis: MITRE ATT&CK, Log Analysis, Event Correlation, Alert Triage, Incident Response, Threat Intelligence, Security Monitoring, Malware Analysis, False Positive Analysis, Vulnerability Assessment

Security Tools: Nmap, Metasploit, Burp Suite, SQLMap, OWASP ZAP, Hydra, John the Ripper, Kali Linux

Scripting & OS: Python (advanced), Bash, Linux CLI, Windows, VMware Virtualization

Networking: TCP/IP, DNS, HTTP/S, Firewall concepts, 802.11 Wi-Fi, Packet Analysis

Cryptography: AES-256, RSA-2048, Diffie-Hellman, Symmetric/Asymmetric Encryption, TLS/HTTPS

PROFESSIONAL EXPERIENCE

Cybersecurity & Ethical Hacking Intern · Tamizhan Skills – RISE Program, New Delhi

June – July 2025

- Built 7 offensive security tools in Python — network scanner (Netra), Wi-Fi recon (AirTrace), encrypted messaging (EnChat: AES-256/RSA-2048), SQL injection demo (DualAuth), ransomware simulation (SimLock), keystroke logger (KeyScope), password entropy evaluator (EntropyX) — all documented and open-source on GitHub
- Implemented OWASP Top 10 attack vectors with full mitigations in DualAuth — SQL injection, auth bypass, session hijacking, brute-force — each mapped to OWASP category with documented vulnerable vs. secure delta
- Applied practical knowledge of TCP/IP, HTTP, and 802.11 protocols through tool development, demonstrating hands-on understanding of attack surfaces applicable to SOC monitoring and triage

PROJECTS

CampusTrack – Secure Cross-Platform College Management System | 2024 – Present

Flask · Firebase Auth · SQLite · Python · Linux · Role-Based Access Control

- Architected and deployed Flask REST API backend with RBAC (Student/Faculty/Admin), Firebase Authentication, parameterised queries, and input validation — serving 100+ active beta users on a live Ubuntu Linux server
- Identified and patched IDOR vulnerability in production with live users — documented with proof-of-concept, root cause analysis, and remediation; designed Firebase security rules and automated log monitoring
- Built bulk CSV provisioning pipeline with role-specific schema validation handling 100+ records, and anomaly detection scripts for uptime tracking

VAPT Assessment – MobiKwik Web Assets [Interview Assignment] | 2025

Black-box Penetration Testing · CVSS Scoring · Formal Report Writing

- Conducted 2-day black-box VAPT against *.mobikwik.com — produced formal report with CVSS-scored findings, proof-of-concept documentation, executive summary, and remediation recommendations

DualAuth – Vulnerable vs. Secure Authentication Platform | 2024

Python · SQL · OWASP Top 10

- Built controlled demo environment with 5 live OWASP attack vectors and full mitigations — each finding mapped to OWASP category with documented delta between vulnerable and secure implementations

CYBERSECURITY ACHIEVEMENTS

TryHackMe — tryhackme.com/p/yashgulatii

Top 2% Globally · Rank 31,908 · 192 Rooms Completed · 22 Badges | 2024 – Present

- Completed SOC Level 1, Junior Penetration Tester, and Cyber Security 101 paths — MITRE ATT&CK detection, Splunk/ELK log analysis, privilege escalation, web exploitation, and network forensics in live lab environments

EDUCATION

B.Sc. (Honours) Electronic Science · Rajdhani College, University of Delhi · 2022 – Present

Relevant: Computer Networks, Python Programming, Data Structures & Algorithms, Internet of Things, Embedded Systems

CERTIFICATIONS

- Google Cybersecurity Professional Certificate · Google, 2024 — Linux administration, secure coding, network security, incident response
- Certified Network Security Practitioner (CNSP) · The SecOps Group, 2024
