

Yash Gulati

SOC Analyst (L1) | Threat Detection & Incident Response

Delhi, India · +91-9205538227 · contactyashgulati@gmail.com
linkedin.com/in/yashgulatii · github.com/yashgulatii · yashgulatii.pages.dev

PROFESSIONAL SUMMARY

Security professional pursuing SOC Analyst L1 roles, with a responsibly disclosed CVSS 8.9 Broken Access Control/IDOR finding in a live production application, a black-box VAPT engagement with a formal CVSS-scored report, and a self-built Active Directory lab (Chakravyuha) building detection-as-code coverage across the AD attack surface. Top 2% global TryHackMe ranking (192 rooms, 22 badges). Google Cybersecurity Certified · CNSP Certified · Microsoft SC-200 in progress, exam scheduled July 26, 2026.

TECHNICAL SKILLS

SIEM & Detection Engineering: Splunk, ELK Stack (Elasticsearch, Logstash, Kibana), Wazuh, Wireshark, Sigma rule writing, IDS/IPS concepts

Microsoft Security Stack (SC-200 prep): Microsoft Sentinel, Defender XDR, KQL (Kusto Query Language), Defender for Endpoint & Identity

Threat Detection & Response: MITRE ATT&CK, MITRE Engage, Log Analysis, Event Correlation, Alert Triage, Incident Response, Malware Analysis, False Positive Analysis

Active Directory & Identity: Kerberos, LDAP, NTLM, AD Tiering Model (Tier 0/1/2), Group Policy

Security Tools: Nmap, Burp Suite, Metasploit, Hydra, John the Ripper, Kali Linux, VMware Workstation Pro

Scripting & OS: Python (advanced), Bash, PowerShell, Linux CLI, Windows

PROFESSIONAL EXPERIENCE

Cybersecurity & Ethical Hacking Intern · Tamizhan Skills – RISE Program, New Delhi

June – July 2025

- Shipped 7 production-documented security tools in Python — network scanner (Netra), Wi-Fi recon (AirTrace), encrypted messaging (EnChat: AES-256/RSA-2048), SQL injection demo (DualAuth), ransomware simulation (SimLock), keystroke logger (KeyScope), password entropy evaluator (EntropyX) — all open-source and documented on GitHub
- Applied practical knowledge of TCP/IP, HTTP, and 802.11 protocols through tool development, demonstrating hands-on understanding of attack surfaces applicable to SOC monitoring and triage

PROJECTS

Chakravyuha – Active Directory Purple Team Lab [In Progress]

2026 – Present

Windows Server 2022 · VMware Workstation Pro · Wazuh/Splunk · Sigma · MITRE ATT&CK & Engage

- Built detection coverage spanning the full AD attack chain — mapped 9 MITRE ATT&CK techniques (Kerberoasting through DCSync and BloodHound ACL abuse) across a 6-VM Tier 0/1/2 environment — authored Sigma detection rules tuned against false positives and documented each rule's logic and log source in a 9-part Hashnode technical series
- Validated foundational SOC infrastructure under realistic constraints — domain controller (DC01) live, file server (SRV01) build in progress — architected a closed 6-VM environment with a deception layer of honey accounts and canary tokens

CampusTrack – Secure Cross-Platform College Management System

Aug 2025 – May 2026

Flask · Firebase Auth · SQLite · Python · Linux · Role-Based Access Control

- Eliminated a critical access-control blind spot before exploitation — identified and patched a CVSS 8.9 Broken Access Control/IDOR vulnerability in a live app serving 100+ active beta users — documented with proof-of-concept, root cause analysis, and remediation; designed Firebase security rules and automated log monitoring

VAPT Assessment – MobiKwik Web Assets [Interview Assignment]

March 2026

Black-box Penetration Testing · CVSS Scoring · Formal Report Writing

- Validated production security posture under real engagement constraints — delivered a formal CVSS-scored vulnerability report within a 2-day assessment window — ran structured black-box reconnaissance, exploitation, and remediation planning against *.mobikwik.com

CYBERSECURITY ACHIEVEMENTS

TryHackMe — tryhackme.com/p/yashgulatii

2024 – Present

Top 2% Globally · Rank 31,908 · 192 Rooms Completed · 22 Badges

- Reached a Top 2% global security ranking — 192 rooms completed, 22 badges earned across SOC Level 1, Junior Penetration Tester, and Cyber Security 101 paths — sustained self-directed lab practice in log analysis, privilege escalation, and network forensics since 2024

EDUCATION

B.Sc. (Honours) Electronic Science · Rajdhani College, University of Delhi · 2022 – Present

CERTIFICATIONS

- Microsoft SC-200: Security Operations Analyst Associate — In Progress, exam scheduled July 26, 2026
- Google Cybersecurity Professional Certificate · Google, 2024 — Linux administration, secure coding, network security, incident response
- Certified Network Security Practitioner (CNSP) · The SecOps Group, 2024
